*HCF stands for hundred cubic feet, and one HCF equals approximately 748 gallons. The District sets its rates per HCF because the District's meters register usage per hundred cubic feet as opposed to gallons. The District recognizes people are more familiar with gallons and converts the usage from HCF into gallons on each bill.

ZONE CHARGE

The Zone Charge is assessed as a multiple of the customer's zone against their usage. Each zone represents a difference of approximately 100 feet in elevation.
