

The map displays a street grid divided into four water zones. Zone A (red) is the largest, covering the eastern and central parts. Zone B (blue) is located in the west and south-central areas. Zone C (orange) is a smaller area in the south-central part. Zone D (purple) is a small area in the southeast. A winding black line, likely a river or stream, flows from the top left towards the bottom right, crossing through all zones.
